

## The War in Iraq will cost each citizen of the United States approximately \$1000

This comes at a time when many people are losing their jobs, homes and health insurance.  
Funding for essential programs is being slashed at local, state and Federal levels.  
U.S. foreign relations are at an all time low.

I do not want my hard earned tax dollars to be spent on Death and Destruction!

I would rather have my tax money go towards something positive and constructive such as:

Education (Headstart for every eligible American child = \$6/US citizen /year )  
Health Care (Health Insurance for every uninsured US child = \$20/US citizen /year )  
Environment (Energy independence with clean technology = \$30/US citizen/ year )  
Other: \_\_\_\_\_

War is not the answer Sincerely, \_\_\_\_\_
